SUMMARY

Final-year Computer Science and Engineering student specializing in Python, C++, and Machine Learning, with hands-on experience building predictive models and full-stack Django applications. Developed a demand forecasting system using Linear Regression and Random Forest algorithms, and built a real-time Gold & Silver price tracking web application integrating live external APIs and web scraping. ServiceNow Certified System Administrator (CSA) and Certified Application Developer (CAD) with working knowledge of ITSM fundamentals and application development. Gained global exposure through an academic exchange program at INTI International University, Malaysia. Reliable, detail-oriented, and quick to learn new tools and frameworks.

SKILLS

Languages: Python, C++
Machine Learning: Regression, classification, model evaluation, feature engineering (Scikit-learn)
Data & Libraries: Pandas, NumPy, Matplotlib
Web Development: Django (fundamentals), HTML, CSS, REST API integration
Tools: Git/GitHub, VS Code, Google Colab
ServiceNow: Application Development (CAD), System Administration (CSA), ITSM Fundamentals

PROJECTS

Product Demand Forecasting 2025
Python, Scikit-learn, Pandas, NumPy | GitHub

- Built and compared Linear Regression and Random Forest models to forecast product demand from ~100,000 historical sales records across multiple warehouses.
- Engineered temporal, lag (lag_1–lag_3), and rolling average (roll_3, roll_6) features to capture seasonality and short-term demand trends.
- Achieved $R^2 = 0.9988$ (RMSE 288.44, MAE 163.43) with Linear Regression and $R^2 = 0.9106$ with Random Forest, demonstrating strong predictive accuracy for inventory planning.

Gold & Silver Price Tracking Web App 2025
Django, REST APIs | GitHub

- Developed a Django-based web application to display live Gold (24K & 22K) and Silver prices, integrating external sources via HTTP requests, ThingSpeak endpoints, and web scraping (Requests, BeautifulSoup) from IBJA Rates.
- Implemented backend parsing and regex-based extraction to clean pricing data, plus 22K gold price calculation from 24K using the standard purity conversion factor.
- Built Django views and JSON responses connecting backend logic to multiple front-end pages (Home, Profile, Settings, About, Login).

EDUCATION

B.E. Computer Science and Engineering — Karpagam University, Coimbatore 2027
CGPA: 6.68 (through 6th semester)

International Academic Exchange Program — INTI International University, Malaysia Aug 2025 - Dec 2025
CGPA: 3.10 / 4.00

Higher Secondary Education (12th) — PKP Swamy Matric Higher Secondary School, Erode 2023
Percentage: 55%

Secondary School Education (10th) — PKP Swamy Matric Higher Secondary School, Erode 2021
Result: Pass

CERTIFICATIONS

- ServiceNow CSA & CAD Certified --- ServiceNow 2026
- CCNA: Introduction to Networks — Cisco Networking Academy 2025
- Introduction to Cloud Computing 2026
- Power BI Analytics workshop — Kongunadu College of Engineering and Technology 2024

ACHIEVEMENTS

- Second Prize, Code Development (Python-based Problem Solving)
  — Karpagam Academy of Higher Education 2024
